DIVIDIA AND JWS INTEGRATED CAMERA SOLUTION *VALIDATION OF VEHICLES TICKETED WITHOUT SIGNATURES!*

Dividia and JWS have created an integrated solution for providing photo verification of the weighing process. When Apex sends a print signal to the printer, it activates the camera to take a still digital photo of the vehicle on the scale. The ticket information is superimposed on the video captured photo, and can then be moved to the central office using JWS Direct Transfer.

For more details call 866-DIVIDIA (866-348-4342).

FEATURES:

- *Unique retrieval of the photos by ticket number.*
- *Ticket information on the video is customizable from the ticket template.*
- *Retro-fit to existing Apex 2/3 systems. No additional Apex software required.*
- *Seamless integration of the two systems.*
- *More than one camera may be utilized.*
- *Provides ironclad proof of vehicle pickup without signatures.*
- *Ability to print or email photos to customers.*
- *Single images, along with raw video are stored for a complete accounting of any incident.*
- *Total site security is available as add-on cameras and software.*
- *Web accessible.*
